## October edition

### Development Updates

Construction in Cherry Hill Village has begun! Preservation Park was the first of the projects in the Village to break ground. Excavation of the ground where the barn has started, and we anticipate that the project, including the construction of the outdoor event pavilion for the Farmers market, will be completed by the end of the year. The Factory building has also started pre-construction, and interior renovations will begin this month. With significant construction going on in the Village, please note the following parking lots that will be available during construction. Click on the map image to see a larger map and detailed description of available lots and learn about ALL the developments going on in the Village.
